About Us

Techno Geeks is the computer club of The Air Force School, Subroto Park, New Delhi. It was instituted in 2008 by the students of TAFS. It is today a well established computer club within New Delhi's tech circuit with its members standing out in various inter-school and national competitions.

The club started hosting its annual computer symposium called '**TAFS TechFest'** in 2014 in collaboration with the Infinity Maths Club in an attempt to facilitate intense competition among the top students of various schools of New Delhi in fields like competitive programming, gaming, A/V editing, photography and more.

Members

Coordinator – Mr. Shivender Bhardwaj
President – Anuj Saharan and Rahul
Vice President – Tanishk Sharma

TAFS TechFest '15 – A brief report

Techno Geeks, the computer club of The Air Force School, hosted their 2nd Annual computer symposium on 20th of August. The grand event saw participation from **more than 300 students** from **more than 35 top schools** of New Delhi in both online and on-site events. The online preliminaries for the competitive programming event and the online decryption event even **saw participation from prestigious institutes all around the world.**

This year, **9** exciting **events** were organised by the club in online and on-site formats. A comprehensive list is given below.

1. **TAFS Code-A-Thon** (Competitive Programming)
2. **Maths Colloquium**
3. **Conceptualise** (Mathematical Model Making)
4. **Total LANage** (Gaming)
5. **Junior Quiz**
6. **Senior Quiz**
7. **Cipher** (Online Decryption)
8. **Flash** (Photography)
9. **Synchronize** (A/V Editing)

In this edition of TAFS TechFest, the results of the various events were also being announced and updated on online media along with photographs of the various events. Our efficiency was greatly appreciated by the participants of the event and remains unparalleled with any other such events. The conscientious and joint effort made by the members and volunteers of the club and computer staff alike under the guidance of Mr. Shivender Bhardwaj (Co-ordinator, Techno Geeks) made the event a grand success.

Techno Geeks, with an affinity for perfection and grandness at its core, has been greatly appreciated by the participants for its organising capabilities through the span of two years that we have hosted TechFest. This year we plan to extend our reach to even more schools and bright minds from schools throughout NCR.

Sponsorship

Naturally, an event of this magnitude brings with it a lot of viewership. For TAFS TechFest '16, we are inviting sponsors from various backgrounds to help us make the event even better. Sponsors will be given various augmented benefits according to the magnitude of the support that they provide.

We wish to expose our participants to different corporate companies as well as offering organisations a stage to showcase and advertise their business to a tech savvy audience.

Benefits

- ## Branding

    The sponsors will be highlighted in **all TAFS TechFest '16 brochures and banners**. We understand the importance of branding very well and take care that our sponsors and supporters are given due recognition.

- Endorsement

Techno Geeks T-Shirts are also a huge part of the club and all sponsors are invited to have a spot on this year's edition of the T- Shirt.

- Exposure

Our sponsors will be **exposed to the students and faculty of NCR's top rated schools.** The most reputed institutes of the capital participate in our event and we're proud of the level of intense competition marking our event.

The sponsors will also get opportunities to showcase their skills on various online platforms as the preliminaries and other online events take place.

- Viewership

All our sponsors are promised **a concentrated audience of more than 300 tech-savvy students** attending the on-site events. The viewership extends to all the people

participating in our online events from all around the world. Unlike most other events in the capital that boast of a large though rather mixed and non-specific audience in general, TAFS TechFest is proud to only host the best of minds and a very **undiluted audience that can be targeted by interested sponsors.**

- ## Sponsored events

The sponsors are more than welcome to conduct their own **sub-events/mini-events** to popularise themselves at the event. We appreciate activities like lucky draws, small quizzes that help increase the enthusiasm of the participants and add to the thrill of the symposium.

We also invite our sponsors **to integrate themselves into the 10 flagship events** that we plan to host this year. These events witness a large participation and guarantee a lot of exposure to the sponsors.

A comprehensive list of all the events that are going to be hosted this year is attached in the same email.

- [Showcase](#)

Although we discourage serious financial transactions on our campus, we do allow sponsors to **showcase their latest technologies/products at the day of the event** to stimulate a sense of curiosity about the organisation among the participants. All sponsors will be provided with a stall at the day of the event.
By and large, our sponsors get full autonomy over their respective showcases **as far as they stay within the school norms.**

Footnote

We would request you to intimate us with all of your terms and conditions before the **12th of August, 2016**. We are expecting support of at least **INR 20,000** from your end. All of the support that you provide to us will be utilised in making this year's edition better than ever before.
